TT-303 Computer Controlled

The Bass Bot™ with InstaDJ O.S.™ is an intelligent sequencer featuring 21st century transistor technology.

An analogue, monophonic synthesizer with classic step entry programming by the user or bot computer-generated patterns. Seven unique preset personality programs, capable to generate up to 224 read only computer generated presets by the Bass Bot™.

An additional 224 Write Editable Patterns can compose up to 7 songs of up to 127 bars. All information is saved to onboard flash (permanent) memory and transferable directly to other Bass Bots via 8 DIN cable, *cloning* or to PC / MAC *backup* for storage with a downloadable transfer application available on website. Other platforms to be supported soon.

Specifications:

Rear Connections:

- Instrument Mix-In Jack to mix audio source with output.
- Selectable Waveform Switch (saw or pulse)
- MIDI IN (MIDI OUT with included 8 DIN cable.)
- CV / GATE OUT Jacks (1 volt / octave)
- Stereo Headphone Jack
- Mono Output Jack
- Power In Jack

Physical Attributes:

- Power: 100-240v adapter (included) 9v or 6v use with 4 x "C"
- UM-2 batteries (not included). / Case Material: Plastic ABS.
- Weight: 730g / Dimensions: 300(W) x 146(D) x 55(H)mm

Front Controls:

- VCO Tune
- Cutoff Frequency
- Resonance
- Envelope Modulation
- Decay
- Accent
- Tempo, Track/Preset and Mode Switch, Power/Volume

Green Statement:

- Our bots are made by bots!
- Robotic labour is used for indisputably, superior workmanship and greener, environmentally friendlier products for our customer to enjoy.

Available from this authorized distributor.
